Statistical Yearbook 2023

National Statistical Office

PREFACE

The Malawi Statistical Yearbook 2023 is intended to provide a summary of the most recent statistical data available from official sources.

It includes key demographic, social and economic indicators, together with statistics on land, climate, population, education, tourism, economic activities, construction, utilities, transport, posts and telecommunication, banking and finance, prices, external trade, balance of payments, national accounts, poverty, child labour and gender indicators.

We extend our gratitude to all those who have contributed to the compilation of this forty-th edition. The cooperation of various organisations in both the public and private sectors in providing the required information is also gratefully acknowledged. Where data has been obtained from a source other than the National Statistical Office, a footnote has been put under each table to acknowledge the source.

Users should note that where statistics are shown by geographic region or district, ordering normally follows a north–south scheme. For users who are not familiar with the district boundaries of Malawi, a map is provided on page vi.

Users are encouraged to visit our website on a regular basis for more recent data series. The address of the website is **<http://www.nsomalawi.mw>**

Note: Children are considered to have received the vaccine if it was either written on the child's vaccination card or reported by the mother. For children whose vaccination information is based on the mother's report, date of vaccination is not collected. The proportions of vaccinations given during the first and the second years of life are assumed to be the same as for children with a written record of vaccination.

¹ Polio 0 is the polio vaccination given at birth.

² BCG three doses of DPT-HepB-HB, three doses of oral polio vaccine (excluding polio vaccine given at birth), and one dose of measles.

³ BCG three doses of DPT-HepB-HB, four doses of oral polio vaccine, three doses of pneumococcal vaccine, two doses of rotavirus vaccine, and one dose of measles vaccine.

⁴ BCG three doses of DPT-HepB-HB, four doses of oral polio vaccine, three doses of pneumococcal vaccine, two doses of rotavirus vaccine, and two doses of measles vaccine.

Note: Children are considered to have received the vaccine if it was either written on the child's vaccination card or reported by the mother. For children whose vaccination information is based on the mother's report, date of vaccination is not collected. The proportions of vaccinations given during the first and the second years of life are assumed to be the same as for children with a written record of vaccination.

Note: Each index is expressed in standard deviation units (SD) from the median of the WHO Child Growth Standards.

Total includes 46 weighted cases with missing information on size of birth.

¹ recumbent length is measured to children under age 2;standing height is measured for all other children.

² includes children who are below -3 standard deviations(SD) from the WHO Growth Standards population median

³ excludes children whose mothers were not interviewed.

⁵ Includes children whose mothers are deceased

⁶ Excludes children whose mothers were not weighed and measured ,children whose mothers were not interviewed,and children whose mothers are pregnant or gave birth within the preceding two months.Mothers' nutrition status in terms of BMI (Body mass index) is presented in table 11.11

⁷ For women who are not interviewed,information is taken from the Household Questionnaire.Excludes children whose mothers are not listed in the Household Questionnaire
